

**A TALK BY COGNITIVE SCIENCE PROFESSOR
DR. BRADLEY VOYTEK**

THE SCIENCE OF SURVIVING THE ZOMBIE APOCALYPSE

Celebrate your halloween by learning more about
ZOMBIES!!!

Come to hear Dr. Voytek talks about Zombies, but be on the lookout for Zombies at the door. Even if you've never seen a zombie movie or television show, you could identify an undead ghoul if you saw one. With their endless wandering, lumbering gait, instable hunger, antisocial behavior, and apparently memory-less existence, zombies are the walking nightmares of our deepest fears. What do these characteristic behaviors reveal about the inner workings of the zombie mind? Could we diagnose zombism as a neurological condition by studying their behavior? By combining tongue-in-cheek analysis with modern neuroscientific principles, Prof. Voytek shows how zombism can be understood via modern neuroscience.

THURSDAY, OCTOBER 31, 2019

12:00PM - 1:00PM

COGNITIVE SCIENCE BUILDING, ROOM 003

FREE LUNCH PROVIDED TO THE FIRST 60 GUESTS!
