PSYCHOLOGY 176: CREATIVITY
Spring 2014
Tuesdays and Thursdays, 11:00-12:20, Pepper Canyon Hall 121

Professor: Craig McKenzie
Email: cmckenzie@ucsd.edu
Office: 2564A Mandler Hall
URL: http://pages.ucsd.edu/~cmckenzie/
Hours: By appointment

COURSE OVERVIEW

Creativity involves the generation of an idea that is both novel and valued, and it is critical to aspects of our lives ranging from mundane (e.g., solving personal and interpersonal problems) to profound (creating works of art, making scientific discoveries). Everyone is creative to some extent, but there is usually room for (much) improvement. We will discuss how to increase creative behavior in individuals, groups, and organizations, highlighting aspects that are common to all three.

REQUIRED READING, WATCHING, AND LISTENING

There is a course reader available from the bookstore. In addition, there are three required books, also available at the bookstore:

One required movie to watch outside of class (available at UCSD library, stream on amazon.com, youtube.com): "12 Angry Men" (1957)

Two required podcasts to listen to outside of class:
This American Life: "NUMMI" (2010)
http://www.thisamericanlife.org/radio-archives/episode/403/nummi
This American Life: "When Patents Attack…Part Two!" (2013)
http://www.thisamericanlife.org/radio-archives/episode/496/when-patents-attack-part-two

TOPICS AND ASSIGNED READING/WATCHING/LISTENING (to be done before each class!):

Week 1: Overview and Introduction

Part 1 (Apr 1): Overview of course

Part 2 (Apr 3): Introduction to creativity and its relation to "Good Thinking"
2. Where Good Ideas Come From: The adjacent possible (pp. 25-42).
(Recommended, but not required, is the introductory chapter from “Where good ideas come from”: Reef, city, web [pp. 1-22].)
Week 2: Case study and the importance of expertise

3. *The Double Helix.* (The whole book…expect 5-6 hrs of reading…don't get bogged down in biochemistry details)

Questions to consider:
- Do you consider the discovery of the structure of DNA to be an act of creativity? Why or why not?
- Would either Watson or Crick have made the discovery on their own? Why or why not?
- Linus Pauling and Rosalind Franklin were in a position to discover the structure of DNA, but didn’t. Why not?
- How long did it take Watson and Crick to make their discovery? Was their first attempt at modeling the structure successful? What was their boss’s response?
- What motivated Watson and Crick?
- To what extent was Watson’s and Crick’s lack of expertise in chemistry an advantage vs. a disadvantage?
- To what extent did creative vs. analytical thinking lead to the discovery?

Part 2 (Apr 10): The role of depth of knowledge

Week 3: Breadth of knowledge and accessing knowledge

Part 1 (Apr 15): The role of breadth of knowledge

Part 2 (Apr 17): Accessing knowledge: Some simple strategies; problem asking; abstraction

Week 4: Accessing knowledge and decision making

Part 1 (Apr 22): Accessing knowledge: Insight and incubation

9. *Where Good Ideas Come From:* The slow hunch (pp. 69-95).

Part 2 (Apr 24): Decision making and creativity

- Come to class prepared to justify your decision as to whether the team should race!

Week 5: Decision making and midterm

Part 1 (Apr 29): More decision making and creativity

Part 2 (May 1): Midterm exam
Week 6: Groups, independence, and social influence

Part 1 (May 6): Discuss *12 Angry Men*

Questions to consider:
- Did the jury strive to reach early consensus?
- Any evidence of peer pressure to conform?
- What was Juror #8’s rationale for discussing the case in the beginning?
- Did the group know more collectively than they knew individually?
- Did the group start off with any assumptions that proved wrong?

Part 2 (May 8): Groups, independence, and social influence

15. The Wisdom of Crowds: The wisdom of crowds (pp. 3-22).

Week 7: Groupthink, cohesion, and brainstorming

Part 1 (May 13): Groupthink and group cohesion

16. The Wisdom of Crowds: The difference difference makes: Waggle dances, the Bay of Pigs, and the value of diversity (pp. 23-39).
17. The Wisdom of Crowds: Committees, juries, and teams: The Columbia disaster and how small groups can be made to work (pp. 173-191).

Part 2 (May 15): Brainstorming

Week 8: Group dissent and creativity in organizations

Part 1 (May 20): Dissent, error, and hidden profiles

Part 2 (May 22): Creativity inside organizations

- Come to class prepared to discuss both readings.

Week 9: Intrinsic motivation, decentralization, and culture

Part 1 (May 27): Intrinsic motivation and creativity

Part 2 (May 29): Decentralization and culture
28. The Wisdom of Crowds: The company: Meet the new boss, same as the old boss? (pp. 192-223).

Podcast: *This American Life*: "NUMMI" (2010)
http://www.thisamericanlife.org/radio-archives/episode/496/when-patents-attack-part-two

Week 10: Crowdsourcing, summary, and group project presentations

Part 1 (Jun 3): Crowdsourcing and summary
29. *Where Good Ideas Come From*: The fourth quadrant (pp. 213-246).

Podcast: *This American Life*: "When Patents Attack…Part Two!" (2013)
http://www.thisamericanlife.org/radio-archives/episode/403/nummi

Part 2 (Jun 5): Group project presentations (and papers due)

**COURSE REQUIREMENTS**

**New behavior reports**
Four times during the quarter you will turn in a short report of a new behavior that you have engaged in since the class started. *The behavior must be something that you would not have engaged in had you not been in the class.* Your first new behavior report (NBR1) will describe a change in your routine (e.g., a different route to school, studying in the morning rather than evening). NBR2 will describe a change in your environment (e.g., rearranged furniture, a tidied study area), NBR3 will describe learning something new (e.g., culture, cuisine, music, viewpoint), and NBR4 will describe a discussion of ideas you had with someone different from you (e.g., different culture, different political views). In each case, the more different the new experience, the better (but use common sense…). The goal is to stimulate new thoughts. Explain what you did and what effect, if any, it had on your thoughts or behavior. These reports should not exceed 150 words. They will not be graded per se, but content will be monitored. A hard copy must be turned in at the beginning of class on Apr 10, Apr 22, May 8, and May 20 (see also course calendar). Late reports will not be accepted. Each report must address a different new behavior.

**In-class short essays**
Three times during the quarter you will answer a short essay question in class. The topic will be either material covered previously or reading that was to be done for that meeting. We will then discuss the question in class. The goal is to motivate you to be prepared for each meeting, make sure you understand important points, and to provide material for discussion. Content will be monitored, but not graded. These essays cannot be turned in late; we will do these exercises at the beginning of class on Apr 17, May 15, and May 27 (see also course calendar). You will need to have pen and paper with you.

**Group paper and presentation**
You will be randomly divided up into groups of 5 or 6 members and come up with a creativity project to write up and present to the class. The goal is for you to seek out and solve a problem, generally speaking. You might come up with a solution to a social problem, or describe a new product or service. What is important is that your solution/product/service is creative – both novel and practical. The idea is to put to use what you have learned from the class in order to come up with something creative. Relatedly, you should also show what you have learned in this course by describing your group (and perhaps individual) process. I would also like to hear the origin of your creative idea – e.g., was it a combination of two old ideas, or the application of an old idea in a new way, or…? I want to hear as much as you can tell me about how you had the idea. In short, describe your creative idea and analyze your group’s creative process. These 1,500-word papers and presentations will be due week 10.
Midterm exam
The midterm exam is scheduled for Thursday, May 1, in class. The exam will be multiple choice.

Final exam
The final exam is scheduled for Tuesday, June 10, 11:30am-2:30pm. The exam will be multiple choice and cover the entire course.

GROUP MEMBER EVALUATION
At the end of the quarter, groups will be asked to evaluate the contributions of their members on the group paper and presentation. This feedback will be considered when assigning course grades, primarily to adjust for any “free-riders”.

GRADING
Your grade will be evaluated as follows:
New behavior reports: 5%
Short in-class essays: 5%
Midterm Exam: 30%
Group paper: 25%
Group member evaluation: 5%
Final Exam: 30%

EXTRA CREDIT
You can earn extra credit by participating in UCSD psychology experiments advertised on the Web (go to ucsd.sona-systems.com). You can earn credit for up to 3 hours of participation. Failing to show up for an experiment you signed up for will cost you credit. Your final grade must be at least a C- to receive the credit. Completing the extra credit gives you a very good chance of moving up 1/3 of a grade (e.g., from a B+ to an A-).

If you want extra credit, but do not wish to participate in psychology experiments, you can write a 5-8 page research paper. The paper will be due at the beginning of class on June 3. No late papers will be accepted. You must consult with Professor McKenzie about the topic before beginning the paper.

ACADEMIC INTEGRITY
Integrity of scholarship is essential for an academic community. As members of UCSD, we pledge ourselves to uphold the highest ethical standards. The University expects that both faculty and students will honor this principle and in so doing protect the validity of University intellectual work. For students, this means that all academic work will be done by the individual to whom it is assigned, without unauthorized aid of any kind. The complete UCSD Policy on Integrity of Scholarship can be viewed at: http://students.ucsd.edu/_files/Academic-Integrity/Policy-on-Integrity-of-Scholarship_eff-fall2009.pdf

STUDENTS WITH DISABILITIES
A student who has a disability or special need and requires an accommodation in order to have equal access to the classroom must register with the Office for Students with Disabilities (OSD). The OSD will determine what
accommodations may be made and provide the necessary documentation to present to the faculty member. The student must present the OSD letter of certification and OSD accommodation recommendation to the appropriate faculty member in order to initiate the request for accommodation in classes, examinations, or other academic program activities. No accommodations can be implemented retroactively. Please visit the OSD website disabilities.ucsd.edu for further information or contact OSD at (858) 534-4382 or osd@ucsd.edu.
