

DictStats

Assembled on July 15, 2016 using the tools in
/Users/hutchins/Documents/workspace/TrobriandDictionary/src/utils.py

Number of main entry headings: 4051

Some of these do not have a pos= line. They are mostly simple cross-references.

Number of separate part of speech entries: 4304. Of these, 372 are prefaced by a '*' character, meaning they are additional pos= entries. That makes $4304 - 372 = 3932$ discrete words, of which fewer than 372 serve as multiple parts of speech.
